Index for Volume 29 (1996)

Number 1 (February) pp 1–76
Number 2 (April) pp 77–138
Number 3 (June) pp 139–194
Number 4 (August) pp 195–258
Number 5 (October) pp 259–352
Number 6 (December) pp 353–404

Article index

Number 1 (February)

Contrast transfer function measurement of X-ray solid state linear detectors using bar/space pattern methods
V. Kaftandjian, Y.M. Zhu, G. Peix and D. Babot 3
Ultrasonic inspection of long steel pipes using Lamb waves
M.H. Park, I. S. Kim and Y.K. Yoon 13
Estimation of acoustic emission source waveform of fracture using a neural network
H. Yuki and K. Homma 21
A new stereoscopic X-ray imaging technique using a single X-ray source: theoretical analysis
J.P.O. Evans, M. Robinson and S.X. Godber 27
Ultrasonic measurement of zirconium tubes used in channel-type nuclear reactors
R. Kažys, L. Mažeika, R. Šliteris, A. Vladišauskas, A. Volešis and K. Kundrotas 37

Number 2 (April)

Variation of the stress dependent magnetic flux leakage signal with defect depth and flux density
T.W. Krause, R.M. Donaldson, R. Barnes and D.L. Atherton 79
Neural network classification of flaws detected by ultrasonic means
A. Masnata and M. Sunseri 87
Quantitative estimation of material properties of porous ceramics by means of composite micromechanics and ultrasonic velocity
H. Jeong and D.K. Hsu 95
Eddy current measurement of the wall thickness and conductivity of circular non-magnetic conductive tubes
B. de Halleux, B. de Limburg Stirum and A. Ptchelintsev 103
NDT of welds: state of the art
R.J. Ditchburn, S.K. Burke and C.M. Scala 111

Number 3 (June)

Development of an on-line evaluation system of formability in cold-rolled steel sheets using electromagnetic acoustic transducers (EMATs)
R. Murayama, K. Fujisawa, H. Fukuoka and M. Hirao 141
A neural network for crack sizing trained by finite element calculations
K. Zgonc and J.D. Achenbach 147
An automated radiographic NDT system for weld inspection: Part I – Weld extraction
T. Warren Liao and J. Ni 157
Detection of internal defects using phase shifting holographic interferometry
A. Twitto, J. Shamir, A. Bekker and A. Notea 163
Improving the evaluation sensitivity of an ultrasonic pulse echo technique using a neural network classifier
M. Thavasimuthu, C. Rajagopalan, P. Kalyanasundaram and B. Raj 175

Number 4 (August)

Strain analysis of moving objects using a Fourier transform grid method
M. Fujigaki, I.H. Yang, Y. Morimoto and E.K. Han 197
Determination of thermal diffusivity distribution for three types of materials by transient thermography
R.P. Brady and M.R. Kulkarni 205
Features of ultrasonic wave propagation to identify defects in composite materials modelled by finite element method
D. Datta and N.N. Kishore 213
Ultrasonic through-transmission characterization of thick fibre-reinforced composites
K. Balasubramaniam and S.C. Whitney 225
Spectral analysis of acousto-ultrasonic waves for defect sizing
B.O. Aduda and R.D. Rawlings 237

Number 5 (October)

Editorial
C.-P. Hu, T.-T Wu and C.-C. Ma 261
Effect of applied stresses on magnetostriction of low carbon steel
T. Yamasaki, S. Yamamoto and M. Hirao 263
Simulation of edddy current signals from multiple defects
B.P.C. Rao, C. Babu Rao, T. Jakakumar and B. Raj 269
Nondestructive estimation of fatigue damage for steel by Barkhausen noise analysis
Y. Tomita, K. Hashimoto and N. Osawa 275
Determination of surface wave velocities in a prestressed anisotropic solid
J.-F. Chai and T.-T. Wu 281
Resolution improvement of ultrasonic C-scan images by deconvolution using the monostatic point-reflector spreading function (MPSF) of the transducer
S.-W. Cheng and M.-K. Chao 293
Non-contract laser ultrasonics for detecting subsurface lateral defects
H. Cho, S. Ogawa and M. Takemoto 301
Integrity evaluation of SiO_x film on polyethylenen terapthalate by AE characterization and laser microscopy
T. Futatsugi, S. Ogawa, M. Takemoto, M.-A. Yanaka and Y. Tsukahara 307
Time-domain reflection field analysis for ultrasonic evaluation of thin layered media
B.-G. Kim, S. Lee and T. Kishi 317
Imaging of surface-breaking concrete cracks using transient elastic waves
P.-L. Liu, C.-D. Tsai and T.-T. Wu 323

Number 6 (December)

Ultrasonic evaluation of the bonding strength of dissimilar metal bonds
H. Kato and S. Abe 355
Surface temperature measurement near ambient conditions using infrared radiometers with different detection wavelength bands by applying a grey-body approximation: estimation of radiative properties for non-metal surfaces
T. Inagaki and Y. Okamoto 363
An infrared line scanning technique for detecting delaminations in carbon fibre tubes
J. Varis, J. Rantala and J. Hartikainen 371
Evaluation of thermal ageing conditions in 17-4 PH stainless steel by Fourier descriptor analysis of magnetic hysteresis loops
N.I. Shakshin, G.I. Deordiev, V.E. Scherbinin, V. Moorthy, T. Jayakumar, D.K. Bhattacharya, P. Kalyanasundaram and B. Raj 379
